MEDICAL
technology for people.

DISCOVER QUALITY. Made in Germany.

AT YOUR SERVICE

Your Product – Our Mission

Since the early 1980s MEDICAL has been producing multi-functional furniture for a range of professional uses all over the world. MEDICAL combines advanced German engineering and industrial production with high-quality traditional manufacturing skills to create durable, sustainable products that are easy to handle.

We are ready to create a product that meets your specific requirements. Are you ready too?

QUALITY IS
A PROCESS

... and not just a feature.

Quality is an integral characteristic of a product. Like its length, width or weight. But we don't just build quality into our products - we live quality, every single day. Together.

Quality should be embedded both within the product itself and in the hearts of those who create it. Matching components are perfectly combined. This is how we at MEDICAL create intuitively usable products with broad, yet unobtrusive, functionality.

We are constantly striving for innovation for the benefit of users and patients. That's what we mean by technology for people.

THE PROMAT SERIES

Perfectly shaped, comfortable, functional

Timeless, simple design and comfortable upholstery combine into a functional item of furniture that takes the effort out of your daily routine. Top-quality, durable materials and excellent workmanship create a reliable product.
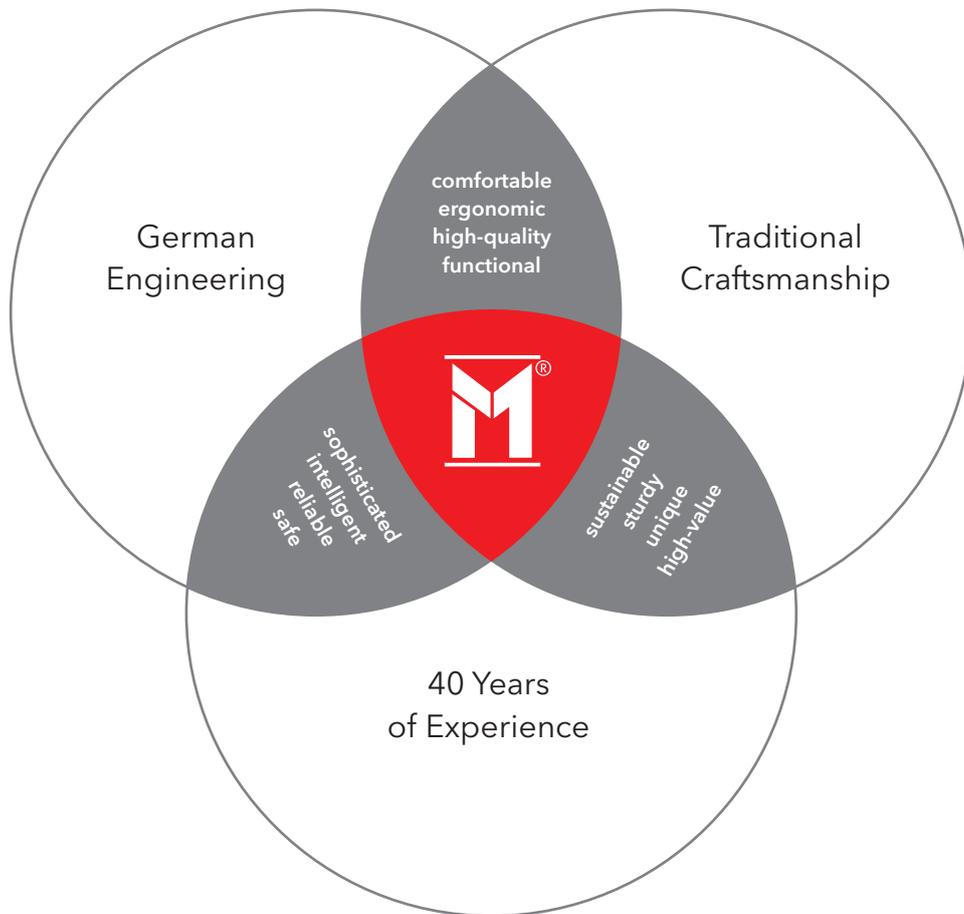

Four powerful actuators, multifunctional armrests, adjustable headrests and footrests, as well as retractable castors will satisfy both you and your patients. And if ever necessary, our easy-to-service construction will ensure that things are quickly up and running again.

PROMAT, the result of 40 years of development and experience with electrically operated treatment chairs.
